Portfolio: [portafolio-sage-phi.vercel.app](#)

PROFESSIONAL SUMMARY

Strategic Systems Analyst with a unique background in Clinical Psychology and Data Science. Expert in bridge-building between human business requirements and technical automation. Proven track record in reducing operational costs by up to 75% through custom AI/Python integrations. Specialized in HR systems, technical reporting, and data integrity.

KEY SKILLS

Core: Systems Analysis, Requirement Gathering, Process Optimization, Stakeholder Management.

Technical: Python, SQL, n8n (Automation), React, HTML/CSS, Git.

Platforms: Google Cloud, Microsoft Azure, Jira, Workday HCM (Interest/Foundational).

PROFESSIONAL EXPERIENCE

Director of Marketing & Design | Revem

2023 – Present | Quito, Ecuador

- Architected a lead generation pipeline using n8n and Gemini API, converting manual prospecting into a measurable, automated system with 100% traceability.
- Audit and execute technical documentation for international industrial clients (Shoubert US), ensuring compliance with North American engineering standards (NFPA/NEC).
- Lead cross-functional teams to integrate data-driven insights into marketing strategies.

Data & Automation Specialist (Freelance)

2023 – Present | International (US, France, Ecuador)

- **Luxarmonie (France):** Developed a product validation system (Python + Claude API) to audit 1,650+ variants. **Result: Reduced manual workload by 75% (40h to 10h/month).**
- **CRE Reporting:** Built a 'Data-to-Design' automation for 200+ financial reports using Python and Adobe InDesign. **Result: 95% efficiency gain and 100% accuracy in audit-ready documents.**
- **Municipal Lighting (Utah, USA):** Created professional submittal packages (DIALux + Photometry) for city engineering approvals, meeting rigorous local compliance codes.
